About Us

At Greeneryway Export, we are more than just a player in the fruit and vegetable industry. As both producers and distributors, we are committed to delivering products of uncompromising freshness, backed by a full-service logistics solution.

With strategic hubs in Sète and Rungis, we oversee the entire supply chain — from harvest to delivery, including cold storage and handling. Our mission is clear: to provide our partners with consistent quality, transparent traceability, and reliable service across Europe.

Our Project

Our vision is to build a sustainable and competitive model that connects production directly to distribution. At Greeneryway Export, we believe in an integrated approach: cultivating, selecting, packing, storing, and delivering fruits and vegetables under the best conditions.

Every day, we develop modern and cost-effective logistics solutions to support our partners' growth, while preserving both the environment and the freshness of our products. Our project is simple yet ambitious: to be the trusted bridge between the land and your markets.
